# ABOUT US

At Kalumo Technology Investment Limited, we take pride in being at the forefront of road construction, infrastructure development, mill relining and plant commissioning. With a commitment to quality, safety and innovation, we deliver comprehensive solutions that pave the way for progress. Whether enhancing transportation networks or optimizing industrial operations, our goal is to ensure that every project we undertake contributes positively to the communities we serve. We are registered with CBR Registration No: C4/341/11/2016

## **Our vision**

To lead the regional market for building construction and civil engineering services.

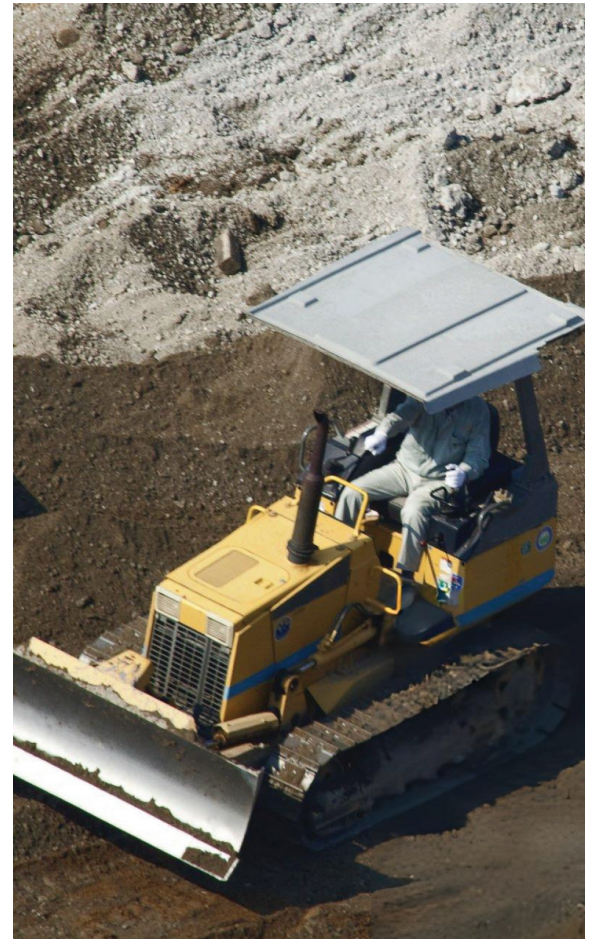

## **Our Mission**

Our goal is to become a premier engineering construction company that offers the best possible quality services in an efficient, cost-effective and sustainable manner.

## **Our values**

In order to meet and exceed expectations and provide timely, long-lasting solutions that last, we are committed to upholding the highest standards of professionalism, integrity, and positive attitude.

The background image shows a construction site under a bright, hazy sky. In the foreground, a surveying total station is mounted on a yellow tripod. In the mid-ground, a worker in a white hard hat and orange safety vest stands near a series of white and orange plastic safety barriers. In the background, two large yellow excavators are visible, one of which is in the process of demolishing a brick building. The overall scene is bathed in a warm, orange-toned light.

## OUR SERVICES

# OUR SERVICES

---

## Road Construction

Our core service is road construction, where we utilize advanced technology and techniques to build durable, high-quality roads that cater to all types of traffic. From urban roads to rural pathways, we ensure our projects are completed on time and within budget while adhering to the highest safety standards.

## Road Maintenance and Repair

Regular maintenance is crucial to ensure the longevity of road infrastructure. We offer a full range of maintenance and repair services, including asphalt overlay, crack sealing, patching, and grading, to keep your roads in optimal condition and safe for all users.

## Earthworks and Site Preparation

Before road construction begins, proper site preparation is essential. Our team specializes in earthworks, including excavation, grading, and compaction, ensuring a solid foundation for all roadways and ensuring compliance with project specifications.

## **Paving Solutions**

Kalumo Technology Investment Limited provides innovative paving solutions tailored to the unique needs of each project. We work with a variety of paving materials, ensuring a smooth and durable finish that meets local standards and withstands the test of time.

## **Project Management and Consultation**

With extensive experience in project management, we guide our clients through every phase of the construction process. Our consultation services include feasibility studies, project planning, budgeting, and scheduling, ensuring that your project runs seamlessly from conception to completion.

## Mill Relining Services

Our specialty at Kalumo Technology Investment Limited is offering complete mill relining services that are suited to the requirements of mining and industrial operations. Our team has a track record of excellence and guarantees the greatest levels of performance, efficiency, and safety in every project we take on.

## Our Expertise

### Comprehensive Relining Solutions

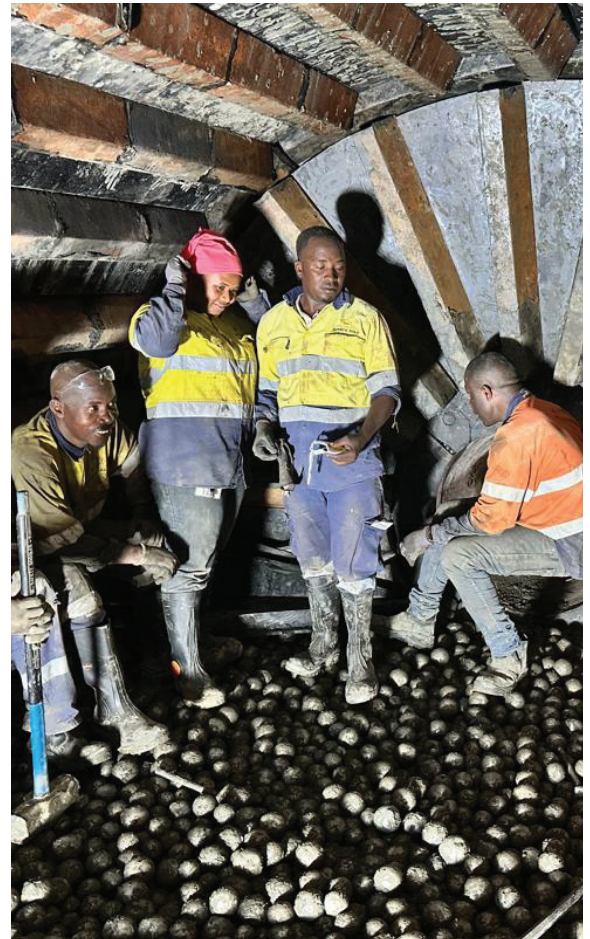

We handle all aspects of mill relining, including planning, removal, inspection, and installation of liners for a variety of mill types, including SAG mills, ball mills, and rod mills.

### Skilled Professionals

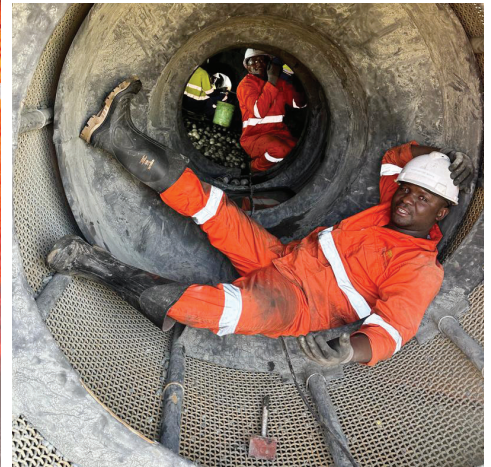

Our experienced technicians are highly trained in the latest relining techniques and technologies, ensuring minimal downtime and maximum operational efficiency.

### Specialized Equipment

Utilizing state-of-the-art tools and equipment, we ensure precision and speed during the relining process, reducing overall project timelines and costs.

## Commissioning of newly built process plant for gold

We provide specialized commissioning services for newly constructed gold process plants. Our expert team ensures that your plant transitions smoothly from construction to fully operational status, delivering optimal performance and seamless integration with your operations.

### Our Expertise

#### Comprehensive Commissioning Process

From initial pre-commissioning checks to final performance testing, we ensure every system, component, and process operates according to design specifications and industry standards.

#### Experienced Professionals

Our team of engineers and technicians brings years of experience in gold processing plants, ensuring that your operation is set up for success.

#### Custom Solutions

Each project is unique, and we tailor our commissioning approach to your plant's specific design, equipment, and operational goals.

# WHY CHOOSE US

---

## **Expert Team:**

Our skilled workforce is composed of engineers, project managers, and construction specialists with a wealth of experience in the road construction industry.

## **Quality Assurance:**

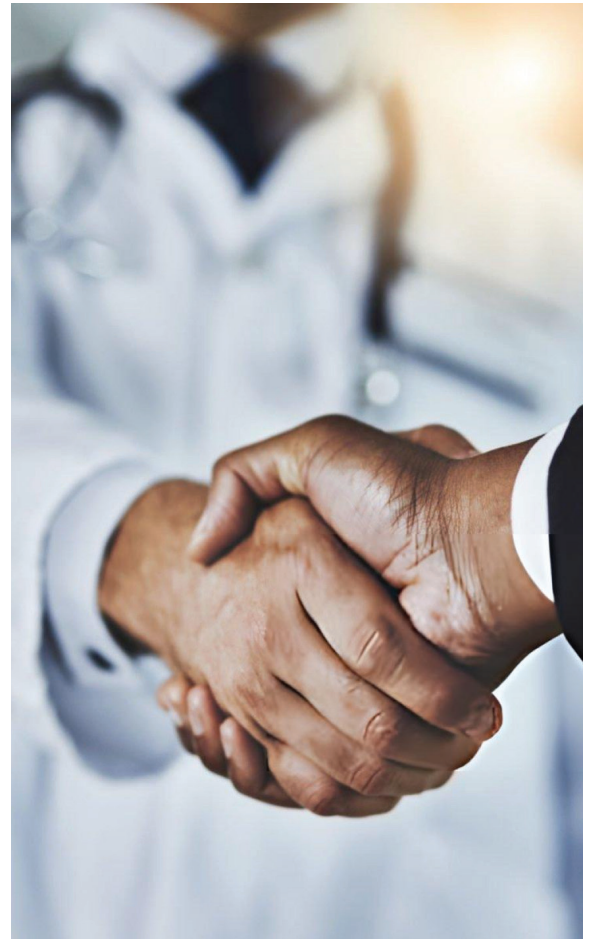

We are committed to delivering top-notch quality in every project. Our rigorous quality control measures ensure that all work meets or exceeds industry standards.

## **Safety Commitment:**

Safety is our priority. We implement strict safety protocols to protect our team, clients, and the public throughout the construction process.

## **Innovation:**

We embrace the latest technologies and best practices in road construction, ensuring that we deliver efficient, sustainable, and cost-effective solutions to our clients.
